

The Victory Electric Cooperative Association, Inc.

(Cooperative)

Replacing Schedule EDR-95

Entire Territory

which was issued December 15, 1995

(Territory to which schedule is applicable)

The cooperative's bylaws, rules and regulations are supplemental to this tariff and are incorporated herein.

Sheet 2 of 2 sheets

Economic Development Demand Credit:

The Economic Development Demand Credit shall be calculated by multiplying the qualifying consumer's monthly demand by the following rates:

- \$7.75 the first 12 months of service.
- \$5.50 the second 12 months of service.
- \$4.00 the third 12 months of service.
- \$3.00 the fourth 12 months of service.
- \$2.00 the fifth 12 months of service.

The dollar credit earned will be applied to the normal monthly bill as calculated under Schedule LC.

Definitions:

Monthly Demand Maximum thirty (30) minute integrated kilowatt demand reading during the month for the New Load.

New Load New Load is defined, for use in this rider, as electrical service, at a location where service has not been provided by the Cooperative during the 12-month period to the date of application for service. New Load is also defined as load that has not been served by any other KEPCo member during the last 12 months.

All other terms and conditions under Schedule LC, Large Commercial Service shall apply.

ECONOMIC DEVELOPMENT RIDER

Applicability:

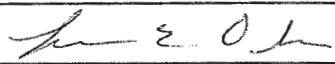

Applicable to consumers who qualify under Schedule LC, Large Commercial Service not involved in selling or providing goods or services directly to the general public and whose loads meet the following additional requirements:

- (a) This rider is applicable to that portion of the demand and energy requirements of a new Member or the increased demand and energy requirements of a Member who has expanded their facilities or operations.
- (b) This rider is applicable to new loads, as described in (a) above, with a demand of 100 kilowatts or more, or new expanded loads with an additional demand of 100 kilowatts or more.
- (c) This rider is applicable to new loads with a load factor of 50% or higher, based on the following:

$$\text{Load Factor} = \frac{\text{Monthly Energy}}{(\text{Monthly Demand}) \times (\text{Monthly Hours})}$$

- (d) Once billed under this schedule, the consumer shall remain on this rate for a minimum of 48 months, unless otherwise approved by the Cooperative.
